yeppers, i'm at the *bimbo's* house for the nite.....

 [niffynoo](#) and i are gettin' along better..

took a day off for work, paid grant \$125 for expenses on the move to ohio, so the car can be released from his name...

ain't life grand??? i'll be moving sooner than i think...

i wanna get a polaroid or some camera, and get pictures....

that'd be kewl...

otherwise, i spent \$190 in stamps just mailing food out... that sucks...a little under 3 days... who'd a figured?

i need to remember to get blank cd's and a case so that i can start copying cd's for archiving, and i've got the plan to get those before i leave....

i'll write some other time...

[**music**]Jamestown Police Dept on the Scanner]

i met matt, some guy who worked for microsoft for 8 years or so, and picked up a *BEAUTIFUL* HP Netserver LM...

that's what i'm working on now.

the only problem was that he didn't give me a password to the NT Server Administrator account, and he doesn't have a clue, so that'll be a total installation of NT 4.0, for mark's sake....

i wanna install Novell, or Redhat....

i usually don't get my way, tho... ;P

i was told it was a dual processor with 4 80gig drives, but all it is is a pentium 90+ with 1 2.1Gig SCSI drive and an 3COM Etherlink 10 card...

it'll run, and i'm gonna make this bitch scream!!!

hehehe...

okay, so i made it one day without smoking a cigarette, and i had one at quarter to midnight only cause it was killing me, but that's progress.... ;)

today would've been  niffynoo's and i's 9 months, but we're no longer going together now...

otherwise, life is usual....just grand....

goin' to call an old friend around 2am, so i can get back in touch with society...

i feel bad now, cause  niffynoo's crying...

i still have a couple left, and i'm pretty sure i'll keep it like that.

mark wants me over early, so that i can most likely get my cash. the guy that i have to cable just wants me to check it... :(

[mood| envious]

couldn't sleep last nite, except when i took a nap with  niffynoo around noon.

drove around, saw mark, and picked up a very old and dear friend, jessica...

went to the mall, got  niffynoo's cd-player in her car to sound like, better, than it was before. had to go to REX near the mall and work with those guys to the point

where they just gave us a new one, only cause it was under warranty...

my trumpet sold @ lander for \$60.00 (shitty, but useful). the auction house takes 20%, so i'll be giving them \$12.00 and i'll be gettin back \$48.00.

mark said he's got a ethernet wiring job for me, so i'll take it just to make up for the difference for the trumpet. if it's alot, i'll charge him alot. just to look professional, i'll keep track of my hours. i never thought i'd do wiring on a sunday ever again ;)

otherwise, just chillin...

as of midnight tonite, i'm gonna quit all the nasty stuff and get on the good stuff... quit smoking, drinking, and eat and work out more...i should achieve results in 2 weeks, but the target time is 4 weeks...

i'm out for now. i need to eat my 2.5lb chuck alive..

well, 4-20 was a slight buzz @ 4:20....

took [j](#)eekey and [i](#)cecreamy out for a nite, and what a crazy nite that was....

side note: [j](#)eekey, you didn't have to flip the bill at aldo's... i never told ya to do so ;p

otherwise, i'm doing what i do best: copying copyrighted material....

i know what that means, as does everyone else that i've told...

i *wish* i had a computer...

I *wish* i had a computer...

maybe if i clicked my heels together, it'd be here.....

some people won't run my stupid tracker program ever since i made it. all it does is scan DFT communications, alltel, and Modem Madness IP ranges for NetBIOS names, cause mine's got a specific name, and it doesn't take much processor from the OS (could anyone give up about 2% processor????.)

college countdown: 12 days (or more) and counting. i might go into the negatives with this one, but don't quote me....

my trumpet sold at lander, P.A. Auction, and i'm supposed to be getting the price for it... i *hope* it made it over \$100.00...

looks like W32/Sircam-A is makin' it's rounds.....

i've been fighting this SOB for a while now, and i recognized the message body. fortunately, it was in my junk mail, so it should be weaned out. however, whomever jaxon82@hotmail.com is, i'm gonna send them a brief message askin' who the fuck they are to have my addy in their mailbox... ;)

that's another thing with Microsoft. the stupid fuckers bought out hotmail and integrated it, so that outlook express can shoot shit to everyone in the world twice as fast. money is good....

the one thing i'd like to see is microsoft coming out with a *ahem* bug free operating system that could be easily developed and with it's own internet integrated virus scanner.

that operating system would bring in the dough....

i think i'll start some code on that shit.....

otherwise, shit's good so far. still goin to college, the time is different, tho...

i'll try to write more... ;)

[mood|😞 numb]

 [niffynoo](#) and i had a fight last nite, and things were blown outta proportion.

i watched 13 ghosts for the first time, and it was the shit. i gotta get that. i loved the princess chick ghost. she was hot...

i had a dream of falling in love with a girl i went out with before. it was like, total happiness, and she doesn't smoke, but she had 2 packs of doral menthol with her, and she was smokin. she gave me some, and it was like, total bliss. she kissed like my first love did, and it was kewl. then jen and i were in the car and i told her about it, and she got upset and tried to hit me, but i bitch-slapped her and got her head stuck between the top of the dash and the window. it was kewl...

i'll wb later... gotta jet
